

West Lancashire CCG and Shire Pharmaceuticals Limited

Joint Working Project Executive Summary

West Lancashire CCG and Shire Pharmaceuticals Limited are engaged in Joint Working to help to develop a new multi discipline approach to West Lancashire CCG's commissioning of ADHD services

Both parties have committed resources to support this project, which will run from June 2017 – November 2017.

The objective of this Joint Working project is to work towards the delivery of an all age mental health service for the people of West Lancashire. In particular the CCG is reviewing the specification and commissioning of services related to Attention Deficit Hyper Activity Disorder (ADHD).

Designed to support:

- Patient choice (setting, information, type of care, resources)
- Reduced waiting times
- Ensuring patients have an opportunity to set their own goals and that their views are respected
- Self-care and self-management
- More effective shared care
- More effective cross functional working both within the NHS and with other agency partners
- Training for relevant medical and none medical practitioners, especially on the use of appropriate, effective, and well tolerated medicines.
